Professional Summary

Multidisciplinary Engineer with a strong foundation in mechanical design, software development, and emerging technologies. Experienced in leading complex projects from concept to implementation, combining analytical problem-solving with hands-on technical expertise. Proficient in a broad range of tools and languages, including CAD software, programming, and machine learning frameworks. Adept at collaborating across diverse teams, adapting quickly to new challenges, and delivering innovative solutions that improve efficiency, performance, and user experience. Driven by a passion for continuous learning and applying engineering and software skills to create impactful, real-world solutions.

Skills

Technical: ROS, SLAM, LiDAR, MATLAB, Simulink, Simscape, SolidWorks, ROBODK, Python, C/C++

Soft Skills: Project Management, Leadership, Problem Solving, Communication, Patent Portfolio Analysis

Languages: Turkish (Native), English (C1), German (Basic)

Experience

UNIMAK Machine – Project Management Assistant | Bursa, Türkiye | 02/2024 – Present

- Designed and executed comprehensive analyses of mechanical and control systems, improving operational efficiency by an estimated **15%** in targeted production lines.
- Collaborated with cross-functional production teams to identify and resolve workflow bottlenecks, reducing downtime by **10%**.
- Developed and deployed internal web and mobile applications, cutting administrative processing time by **30%** for sales and production teams.
- Led a machine learning research initiative projected to increase overall factory productivity by **12%** through predictive maintenance and process optimization.

Erdem Kaya Patent – Patent Attorney Candidate | Bursa, Türkiye | 2023 – 2024

- Evaluated **100+** client inventions for novelty and innovation against international patent databases.
- Drafted patent applications and advised on intellectual property protection.

ULUROVER TEAM – Founding Team Captain | Bursa, Türkiye | 2022 – 2024

- Directed a team of **20+** engineers and designers to successfully deliver a fully functional autonomous rover within competition deadlines.
- Developed SLAM-based navigation using ROS, LiDAR, and stereo vision, achieving autonomous navigation accuracy within **±5 cm**.
- Implemented MoveIt for robotic arm control, improving task completion speed by **25%** compared to initial prototype.
- Designed embedded systems for PC-ROS–Arduino communication, reducing latency in motor control by **40%**.

Volemus – Fixed Wing UAV Aerodynamics Designer | Bursa, Türkiye | 2021 – 2022

- Designed and tested fixed-wing UAVs using NACA profiles, XFLR5, and SolidWorks CFD, increasing aerodynamic efficiency by **12%** compared to previous models.
- Conducted structural load testing on wings, validating capacity to handle **20%** higher stress loads without failure

Certifications

- MATLAB Onramp – MathWorks
- Simulink Onramp – MathWorks
- Simscape Onramp – MathWorks
- Foundations of Project Management – Google
- Certificate of Achievement – Anatolian Rover Challenge
- Certificate of Participation Quantum Computing – QSB | ITU
- Certificate of Completion Python -Kaggle
- Certificate of Completion Intro to Machine Learning -Kaggle
- Certificate of Completion Pandas -Kaggle
- Certificate of Completion Intermediate Machine Learning -Kaggle
- Certificate of Completion Intro to Deep Learning -Kaggle
- Certificate of Completion Computer Vision -Kaggle
- [CS50 Certificate Of Completion](#)

Education

Bursa Uludağ University – B.Sc. Mechanical Engineering | 2020 – Present

Private Tan Anatolian High School – High School Diploma | 2016 – 2020 (GPA: 93.75/100)
